**TO USE THAN LEAD**

## DAKAFLASH incorporates the reinforced aluminium mesh from Wakaflex with the creped aluminium top sheet and butyl backing from Smartform

DAKAFLASH is a composite laminate flashing consisting of a creped aluminium top sheet with a 100% self-adhesive butyl backing. Embedded into this adhesive is the same aluminium mesh that's inside Wakaflex, which gives DAKAFLASH rigidity and support, as well as allowing for a smooth contoured finish on the roof surface. DAKAFLASH can stretch up to 30% in length and has a two-piece protective HDPE backing.

**BEST FOR** – New build homes, second storey additions, abutments, chimneys, and flashing maintenance. Use on tile, metal, and polycarbonate roofs.

- >> Internal aluminium mesh
- >> Fully self-adhesive butyl backing
- >> Creped aluminium surface
- >> Can be used as part of a BAL 19 system
- >> Complies with AS/NZS 4020:2005 'Testing of products for use in contact with drinking water'
- >> Only to be used on a roof pitch of at least 12°

**DAKAFLASH is the best value lead free flashing available in Australia, and brought to you by the same German manufacturer and Australian distributor that brought you WAKAFLEX.**

DAKAFLASH utilises the same inner mesh as WAKAFLEX; for strength and durability, and the same butyl and top sheet technology as SMARTFORM; for ease of installation and UV resistance. DAKAFLASH offers you all of these benefits as well as being up to 30% cheaper than lead.

**Compare your cost per lineal metre. See how much you'll save!!!**

DAKAFLASH is the perfect flashing for new build homes, flashing around a chimney or abutment, or repairing a faulty lead flashing. Evo Building Products is confident that you'll agree; DAKAFLASH is now the best value flashing available in Australia.
